

Two Dollars a year, in advance.
Massillon, Wednesday, July 24.

REPUBLICAN TICKET.

President.....CLYDE S. GRANT.
Vice President.....HENRY WILSON.
Congress.....D. WOODBURN.
Secretary of State.....ALEX. T. WYCKOFF.
Supreme Court.....JOHN WELCH.
Board of War.....R. R. RORTER.
Probate Judge.....A. W. HELDENBRAND.
Commissioner.....JOSHUA WOOD.
Treasurer.....SAMUEL STOVER.

Amnesty means to forgive. Then why not do the thing on a big scale? Traitors are counted bad men, and by the laws of the country, in many cases, deemed worthy of death. Such a confab as the following might be suppositions, yet not unreasonable.

Uncle Sam.—Jeff Davis, what did you do to destroy the government?
Jeff.—I was at the head of the conspiracy and did all I could to carry out the rebellion.

U. S.—You are amnestied. And what did you, and you, and you do, addressing Beauregard, Johnson, and a long row of rebel generals, and subordinates.

All.—We did our bloody best to help Jeff Davis kill the government.

U. S.—You are amnestied.

Uncle Sam becomes still more cruel. He now goes to the state prisons where there are thousands of convicts, and asks them what they had done that brought them there.

Convicts.—Oh, not much of anything. A good many of us have stolen horses, money and other property, others have robbed widows and orphans, others have burned houses and cities, others have made railroad traps, others have swindled to the amount of millions, and an army of murderers say, we have shed the blood of thousands of innocent victims.

U. S.—Turnkeys, open the prison doors—these men are amnestied. If traitors can be pardoned why should not they?

And so the list might be indefinitely extended—amnesty is the shibboleth that hides a world of sins, according to the Greeley theory. And not only that, but as a reward of merit put these traitors, robbers, thieves, house-burners and murderers into places of trust—they should be furnished with fat offices.

But the end is not yet.

U. S.—Gen. Grant, what have you been doing?

Grant.—Way, I have been trying to do your bidding. With the aid of thousands of patriotic men I was instrumental in some degree, in crushing out the rebellion, and since then I have endeavored to administer the government to the best of my abilities.

U. S.—But, sir, you are charged with certain unpardonable political sins, and a class of men who want your place say that you must be put down.

G.—What have I done to call down such punishment?

U. S.—Why, you are charged with the heinous crime of keeping your father in a little postoffice, and appointing as much as a whole dozen of relatives to office.

G.—Anything else?

U. S.—Nothing else of such terrific magnitude as this last charge. Re-grades to the government, traitors to law and order, rebels to everything a patriot regards as sacred—they can all be amnestied, but for you there is no forgiveness—you are utterly condemned—your sins are too great to be overlooked. This is amnesty or no amnesty according to the way in which the new Greeleyists would be pleased to use Uncle Sam, if they had the power.

While the chiefs among the railroad men are taking the kinks out of the P. F. W. & C. R. W. by making it straighter west of us, the Ohio Patriot well suggests that it may carry on that sort of reform east of us. By so doing it will save some fifteen miles of crooked, steep road, and if thirty trains a day—and there is said to be fifty—each saves fifteen miles of travel, four hundred and fifty miles of travel will be avoided in one day—2700 miles in a week, or 135,000 miles in a year. Railroad men are practical, and if they look into this thing, the more they examine the more they will see it.

A few days ago certain of the New York courts commenced the trial of Tweed, the great Tammany ex-chief and noted thief. There is so much bogus doing in the courts of that city that outsiders don't believe but that the whole thing will be another judicial farce. If Tweed had stolen Hoffman's horse he might go to the penitentiary. But as he only took about \$20,000,000 of the people's money, why the peccadillo is not worth serious attention in a dignified New York court. Stokes is about as good as clear, so far as N. Y. just is concerned.

On the 18th inst. the Massillon Coal Mining Company was incorporated at Columbus—\$30,000.

It is said that the editors of the Cincinnati Commercial and the Enquirer have commenced quarrelling about which shall have a place in Greeley's Cabinet. Pretty early to begin to count chickens before the eggs are laid, though Horace is cackling with a forty hen power.

Mr. Voorhees has been converted to be a Greeleyist.

There is a possibility of being mistaken in the matter, but to us it looks very much as if the anything-to-beat-Grant movement, so far as many ex-democrats are concerned, has much more of hate to Greeley than heart toward Greeley. What do they care for Greeley? They only use him as a wedge to split republicans.

Nasby was at Baltimore, and has a general power of attorney to electioneer for Greeley—consideration, postoffice at the corners.

Our government, it is said, purchased the archives of the confederate states, and they are delivered—for \$75,000.

Less than a score of years ago the party calling itself democratic was able to furnish the country with any number of candidates for president, and all the offices down—now they are out of office seeking timber and are ready to gobble up anything, even the blackest of the black republicans.

That is a coming down that beats Crockett's con out of his skin.

General Brinkerhoff, of Mansfield, helped the new kind of rats ratify at Canton on last Saturday evening.

Here the ratify has not yet come in. Tiving Brooks, a disappointed sore head of Salem, helped the same sort ratify at Wooster.

An attempt was made, one day last week to kill Amadeus, the Spanish king, by shooting, but the assassins missed their mark. The perpetrators have been caught.

Early in August the state election in North Carolina takes place, and accordingly stumpers on both sides are very busy there.

A railroad accident of a serious character took place near Pittsford, N. Y. on the 18th, by which three persons were killed and several injured.

Daily reports afflict the papers concerning the doings at Geneva, but nothing of a final character has thus far been developed.

Early in August the North Carolina election—first of the season—takes place, and active speakers are at work on both sides. It is not very probable that many of the colored votes will be inveigled into the Greeleyist trap—they don't admire democracy in any shape.

Staubenville has passed an ordinance having for its object the suppression of the sale of ale and beer in that corporation. But another indication of the wish of the people. Prohibition is the feeling which prompts these manifestations.

Not long ago it was suggested to an ardent Greeley man that his favorite had never given evidence of administrative ability. His reply was, Why, has he not established and carried on the greatest newspaper in the world?

The information appeared to be new to him that the Tribune and papers which Mr. Greeley started before that, were financial failures; and the Tribune was never on a healthy monetary basis until Mr. McClath took hold of it. Since then it has prospered financially, as competent managers are in the stock company who own the paper. As an editor Mr. G. is a notable success—but if he could not manage the business of a newspaper he would make a poor show of controlling the interests of the country.

Recent floods in Alabama have caused great loss of property; no less than \$5,000,000 is supposed to be the amount. The cotton crop is materially injured.

That Cincinnati convention was got up as a reform concern. A big element in that reform firm is the Tammany ring, and they are model reformers.

On the nomination of Greeley at New York Tammany hung out the banner on which was inscribed, "Tammany responds to the nominations of the convention at Baltimore." If Mr. G. is proud of such a certificate he has changed his notions about that prolific source of political corruption.

It is just reported that cholera has broken out badly in Russia, especially at St Petersburg and Moscow, and that thousands of people are trying to run away from it. The proportion of deaths to recoveries is reported as eight to one. Perhaps the story is exaggerated. In 1832 the cholera came via Russia to this country.

Heavy rains are reported to have fallen in Pennsylvania on last Sunday. The wet on that day must have been extensive.

The fact is noticeable in a good many Greeleyist papers that in printing the names of their candidates, those of Greeley and Brown appear without any party designation, while the rest of the ticket is headed Democratic. Isn't this amalgamation?

Last week the daily papers were all more or less profuse in giving some account of a great horse race at Saratoga. It was a big time among sportsmen, but pretty near death to some of the horses.

Nike people and their council are on the eve of passing prohibitory laws against the sale of liquor. There is no mistake but things are working.

Some forty-seven narrow gauge locomotives are said to have been ordered for the use of the A. & G. W. R. W., which indicates that the company soon contemplates making the road the ordinary width.

A newspaper a few days since published the idea that Mr. Livingston, the noted African explorer, is crazy—at least not quite right—because he hangs on to that torrid country with such pertinacity that he refuses to return home, and alleging that he is married to an African woman. The story may all be made up.

How extensive the feeling is we have no means of knowing, but judging from Brick Pomeroy's Democrat the true blue, no surrender democracy are very far from being dead yet. They indicate symptoms of waking up some day, and are bound to have that national convention at Louisville.

Reading the Tribune, if the reader believes all that appears there, why there is little use of an election, excepting for the sake of formality—for Greeley is going to get all the votes, sure. We can tell more about this in November next.

STEAM POWER FOR CANALS.

EDITOR COMMERCIAL: A telegraphic item in your paper this morning from Albany, N. Y., is worth to me much more than all the rest of the matter in it. It tells me that the trial of the Erie Canal, in handling boats on the Erie Canal, was completely successful—that it drew three loaded canal boats at twice the speed of horse power so applied.

This is a great event for Toledo, and Detroit. It forecasts a change in summer transportation, which will give direction to the business of railroads from Chicago, Indianapolis and St. Louis. For much of their freights during the season of water transport, Toledo will be their newest and best port. Detroit may compete for that which is brought by rail through Chicago.

Williamson's Road Steamer, or some improvement of it, seems destined to revolutionize transportation, to some extent, on land and water. It is admirably adapted to use on the great western plains, where railways would be too expensive, for the business to be done. It may, also, be used to cultivate the plains. But, if it enables us to have cheap and speedy transportation by canal, it promises great good to our city.

Canada has, I understand, provided twelve millions for the improvement of her water way, from Lake Erie to the deep waters of the St. Lawrence. That done, steam towed barges will take freights from our wharves to Montreal so cheaply, that only light and very valuable goods will be carried by railroads during the season of navigation. Our route must and will be made to compete with that of Canada. The Erie Canal should be enlarged and perfected, as a national work. But the State of New York, and the great city, especially, has too deep and vital interest, in having a good navigable channel to the Upper Lakes, to allow many years to pass before entering on its construction. If it should cost that city one hundred millions, it will amply repay its cost, in the benefits conferred.

Respectfully yours,
J. W. SCOTT.

Toledo, July 18, 1872.

The New York strikes show that twenty out of the forty thousand mechanics of that city were, by their own volition thrown out of employment.

Their wages—the wages of twenty thousand men—for four months would amount to not less than one million five hundred thousand dollars. This amount could have been earned by the strikers had they been at work. The loss might therefore be estimated, as applying directly against the interests of the strikers, to amount to two million two hundred and fifty thousand dollars per month. If there is any economy, profit or advantage in a result of this sort, it is difficult to find it.

Cincinnati

NATIONAL INDUSTRIAL EXPOSITION

THE THIRD

GRAND EXPOSITION

WILL BE OPEN FROM

September 4th to October 31st, 1872.

Goods will be received from August 14th to 31st.

The Sixteen Grand Departments have been greatly extended, and the Exposition will be the

Largest ever held in America,

The Exhibiting Space under roof being SEVEN ACRES.

Extensive arrangements have been made for transportation of visitors at reduced rates. Exhibitors should make immediate application for space. Rules and Premium List furnished on application.

472-10

Who have injured themselves by a certain practice, initiated when alone, habitually, and which, which ruin to the body and mind unfitting them for either business, study, society or marriage.

These are some of the sad and melancholy effects produced by early habits of youth, viz: Weakness of the back and limbs, pain in the breast, dimness of vision, loss of mental power, palpitation of the heart, dyspepsia, nervous irritability, symptoms of consumption, derangement of the digestive functions, &c.

MENTAL.—The effects on the mind are much to be dreaded. Loss of memory, confusion of ideas, nervousness, self-distrust, love of solitude, timidity, &c., are some of the evils produced.

Thousands of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pale, nervous, and emaciated, having a gray appearance about the eyes, cough and symptoms of consumption.

YOUNG MEN

DR. FISHLATT

Will arrive at the
AMERICAN HOUSE,
MASSILLON, O.

On Wednesday, August 21st,
WILL REMAIN FOUR DAYS,
Where he can be consulted on.

Diseases of the Kidneys
AND
Diseases of the Bladder

Such as Stricture, Weakness and General Debility.

DR. FISHLATT

Has discovered the most certain, speedy and only effectual remedy in the world for weakness in the back or limbs, stricture, affections of the kidneys or bladder, involuntary emissions, impotency, general debility, nervousness, dyspepsia, languor, low spirits, confusion of ideas, palpitation of the heart, timidity, trembling, dimness of sight or blindness, disease of the head, throat or skin, affections of the lungs, liver, stomach, or bowels, those terrible disorders arising from solitary habits of youth—secret and solitary practices, more fatal to victims than the song of the syrens to the mariners of Ulysses, blighting their most brilliant hopes and antipathies, rendering marriage, &c., impossible.

NEWSPAPERARCHIVE®

"Wake up, here, and pay for your lodging," said the deacon, as he nudged a sleeping stranger with the contribution box. We were there, and we heard the sleepy stranger murmur, with a glance at the minister whose sermon had narcotized him, "Lodging!—add bored too!"

Mr. Matthew Hale, the eminent jurist, said a century ago: "If all the murders, manslughters, burglaries, riots, tumults, adulteries, fornications, rapes, and other enormities committed in the country (England) were represented by five parts, at least four parts would be beyond dispute directly due to intemperance."

It is stated that the New York and Erie-railroad company have forbidden the sale of intoxicating liquors at the restaurants along the line of their road. A good example! Many railroad disasters are the result of drunkenness, and temperance should be a controlling influence in the management of these important public thoroughfares.

"A saloon!" Almost every exchange brings record of a "row"—a "fight"—a "murder," and always at a "saloon," where honorable men are selling rum under proper regulation. Why do not the murders occur at cabinet, carpenter, blacksmith, or harness shops? Is the problem difficult of solution?—*Wisconsin Chief.*

The best community on earth in which liquors are sold, would be made better by suppressing the traffic; while the worst place on which the sun shines, that is free from such sale, would be made still worse, by allowing it.

A rocking chair fan has been invented, which, during the hot season, will be particularly grateful. An elastic curved arm is fastened to the back of the chair, and bends at a convenient distance over the head of the sitter. To the end of this is attached a swinging fan, which, on the slightest movement, swings to and fro, acting as a fan without any exertion on the part of the sitter.

We protect our fish and our birds by penal statute—why not our men? We debar men from introducing diseased cattle into our state, but rest satisfied with having diseased men constantly manufactured by poison shops in our midst. Consistent people!

A Boston Yankee observed that John Chinaman didn't whistle, so he opened a whistling school in San Francisco, where fifty Pagans now "do" Yankee Doodle, with only a slight Celestial accent.

Holloway's Pills and Ointment.—We do not regret that the thousands hourly hurried to a premature grave, victims of having neglected the first symptoms of disease. Whether in the body, or be introduced externally through the skin—fatal results may be averted off by a timely recourse to one or both of these medicines. 25 cents a box or pot.

This is an apology for whisky drinking; it is a medicine that cannot be used to intoxication; it produces a tonic effect, as well as acts as a cathartic. In fact, Simmons' Liver Regulator is pronounced an unexceptionable medicine.

Piles and quarts of filthy catarrhal discharges. Where does it all come from? The mucous membrane, lining the chambers of the nose, and its little glands, are diseased so that they draw from the blood its liquid and exposure to the air changes it into corruption. This life liquid was to build up the system, but it is extracted and the system is weakened by the loss. To cure, give strength by using Dr. F. J. C. Golden Medical Discovery, which also acts on the liver, correcting the system, and apply Dr. Saxe's Catarrh Remedy with Dr. F. J. C.'s Nasal Decongestant, the only method of reaching the upper cavities where the discharge accumulates and comes from. The instrument and two medicines sold for \$2 by all druggists.

"CAN'T DO WITHOUT IT."—This is what the stage and horse car companies, livery stable keepers, members of the turf, and all grooms and trainers say of the Mustang Liniment. They "can't do without it." And why? Because it infallibly reduces the external swelling, which, under various names, impair the usefulness and value of the king of quadrupeds, and also horses, for strai, sprains, galls and other troubles which horse-flesh is liable to. It is the most trustworthy preparation in the market. Yet, so we are quite sure, it comprises a portion of its claims to public confidence. During a period of more than 16 years, it has been recognized as a specific for many of the most annoying disorders which afflict the human family, such as rheumatism, gout, neuralgia, lumbago, headache, sore throat, catarrhs, toothache, and likewise as a peerless application for cuts, bruises, burns and scalds.

PHILOSOPHY—OLD AND NEW.—In the earlier history of medicine in the treatment of lung diseases, of which consumption is the chief, the philosophy of cure consisted in weakening and depressing the system, so as to keep down the rapid circulation which, like a torrent, threatened to tear the constitution to tatters. To find this out, it is not necessary to ransack the archives, but to over the volumes that moulder on the shelves of antique libraries, as there are living among us those whose memories will bear them back to the time when it was common, and few if any survived such unreasonable treatment. The means of cure now in use, of which Dr. Keyser's Lung Cure is a prominent part, are wholly different from this, and instead of tearing down and weakening the powers of nature, on the contrary are calculated to tone and build them up. Prudence should dictate that whatever the disease is, much will be gained in its cure and advantage of early and correct treatment; especially in this case of a disease of such frightful mortality as consumption. The new plan of treatment pursued by Dr. Keyser has succeeded in some of the most extreme cases, some of which are published in his treatise on chronic lung diseases, which will be sent to any address free of charge. Price of Lung Cure \$1.50 per bottle or 4 bottles for \$5. If your druggist has not got it, send to Dr. Keyser, Liberty St., Pittsburg, Pa., or to the publisher, J. W. Spencer, 107 N. 1st St., St. Louis, Mo., and on Saturday night until 9 o'clock.

\$250 A Month easily made with stencil and key, check dies. Secure circular and samples free. S. M. Spencer, Brattleboro, Vt.

900,000 ACRES
Excellent Farming and Splendid MICHIGAN PINE LANDS, for sale, on which are One Thousand Millions of Pine timber, and Inexhaustible quantities of Maple, Beech, Elm, Ash, etc. The grant of lands to the Grand Rapids and Indiana Railroad Co., to build their road from Ft. Wayne, Ind., to Traverse Bay and Mackinaw, Mich., comprising in its farming lands every variety of soil, from the rich clay loam, to the light sandy, and the pine land of that section of Michigan, north of the city of Grand Rapids, and contiguous to the great fruit belt on the eastern shore of Lake Michigan, now being rapidly developed by railroad and other enterprises. The Pine Lands are situated on the Muskegon, Manistee, Pere Marquette, White, Elk, Tannock, Flat and Rouge Rivers, and lying twenty miles on either side of the surveyed line of said road, and are in the heart of the Pine section, from which Chicago is so largely supplied.

Farming Lands are sold to actual settlers, on credit, one quarter down, balance in year's payments, interest 7 per cent. Persons desiring locations for farms will on application at the office, in Grand Rapids, be furnished with tickets over the road, entitling them to return fares, in the event of purchasing any of the company's farming lands. For information about lands, prices, location, etc., address WM. J. HOWARD, 441 9th Land Commissioner, Grand Rapids, Mich. Title perfect.

PETER GRIBBLE'S
Livery, Sale, and Exchange Stable, 1101 East side Mill st., nearly opposite Am. Hotel. Eat and horse and carriage in readiness at all times and for all parts of the city.

JOS. COLEMAN,
AGENT FOR THE

Profitable Bargains
that can only be obtained under the advantages of doing an exclusive and thorough cash business. With thanks for past favors while in the firm, and clerking for J. G. Warwick & Co., we are, Respectfully,
ALLMAN, GROSZ & WETTER,
C. ALTMAN, J. G. WARWICK & CO., J. G. GROSZ,
Massillon, O., Aug. 31—426-1f

FOUTZ'S
CELEBRATED
Horse and Cattle Powders.
This preparation, long and favorably known, will thoroughly reinvigorate broken down and low spirited horses, by strengthening and cleansing the stomach and intestines. It is a sure preventive of all diseases incident to this animal, such as LUNG WATER, HEAVES, COUGHS, DISTEMPERS, FEVERS, FOUNDER, LOSS OF APPETITE AND VITAL ENERGY, &c. It also improves the wind, increases the appetite, gives a smooth and glossy skin—and cures the miserable condition known as a fine-looking and spirited horse. It is a sure preventive of all diseases incident to this animal, such as LUNG WATER, HEAVES, COUGHS, DISTEMPERS, FEVERS, FOUNDER, LOSS OF APPETITE AND VITAL ENERGY, &c. It also improves the wind, increases the appetite, gives a smooth and glossy skin—and cures the miserable condition known as a fine-looking and spirited horse.
